

JAYLEN SHERRILL

Nashville, TN | 615-910-9432 | jaylenbaylen@icloud.com

Open to relocation and rotating on-call/weekend schedules

SUMMARY

IT student and hands-on technical support professional with a track record of troubleshooting hardware, POS/scanning systems, and operational software under time pressure. Comfortable working directly with end users in fast-paced, safety-conscious environments, documenting issues clearly, and escalating appropriately. Currently building practical skills in Microsoft 365/Azure AD administration and IT process tools to support Contour's airport operations, aviation systems, and AI-enabled workflows.

TECHNICAL & PROFESSIONAL SKILLS

- Hardware, peripheral & POS/scanner troubleshooting
- Windows OS support & basic system configuration
- Microsoft 365 / Office Suite; working knowledge of Azure Active Directory concepts
- IT ticketing, incident documentation & knowledge base writing
- Basic web development (HTML/CSS/JavaScript) for internal tools (see Projects)
- Network & connectivity troubleshooting fundamentals; VOIP familiarity
- Customer service, de-escalation & clear verbal/written communication
- Process compliance, attention to detail & multi-priority coordination
- Issue escalation and cross-team coordination

RELEVANT PROJECTS

IT Ticket & Audit Log Tracker (live demo)

- Built an interactive help-desk ticketing web app with a real status workflow (Open → In Progress → Resolved → Closed) where every change is permanently logged to an exportable audit trail — modeled on how a GRC/compliance team reviews IT activity.

IT Knowledge Base Article — VOIP & Connectivity Troubleshooting

- Authored a step-by-step KB article walking front-line staff through diagnosing and resolving common VOIP/network connectivity issues, modeled on real help-desk documentation standards.

PROFESSIONAL EXPERIENCE

Warehouse Associate | Amazon — Nashville, TN

May 2025 – Present

- Operate handheld scanning devices and internal inventory management systems, troubleshooting device and scanning errors in real time to prevent operational delays.
- Escalate technical and system discrepancies through proper reporting channels, coordinating with support teams to resolve issues quickly.
- Maintain high performance and accuracy metrics in a fast-paced, deadline-driven environment.

Ramp Agent | United Ground Express — Nashville, TN

November 2024 – March 2025

- Supported airline ground operations, coordinating with operations teams via internal communication systems — direct exposure to airport/aviation operational environments.
- Reported equipment malfunctions and operational issues promptly to keep flights on schedule.
- Followed strict procedural, safety, and accuracy standards required in a regulated aviation setting.
- Performed effectively in high-pressure, time-sensitive situations requiring structured problem resolution.

Front End Associate | Walmart — Mount Juliet, TN

March 2024 – November 2024

- Provided front-line technical support for customers on self-checkout and POS systems, troubleshooting payment processing and scanning errors.
- Documented recurring system irregularities and maintained transaction accuracy in a high-volume retail environment.

EDUCATION

A.A.S., Information Technology (In Progress)

Nashville State Community College — Nashville, TN | 2024 – Present
